DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities: The specification does not contain the Serial Numbers of the related US Patent Applications.

Appropriate correction is required.

Drawings

3. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Objection

4. Claim 21 is objected to because of the following informalities: Claim 21 contains "Claim 21" in line 1, which is a typographical error.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 5 and 11-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitations "the content owner network site" in lines 1-2 and claim 11 recites the limitation "the content owner facility network site" in line 9. There are insufficient antecedent basis for these limitations in the claims 1, 5, and 11.

Other dependent claims, which are not specifically cited above are also rejected because of the deficiencies of their respective parent claims.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2155

8. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Jain et al (U.S. Patent No. 6,567,980). Jain's patent meets all the limitations for claims 1-23 recited in the claimed invention.

9. As to claim 1, Jain et al disclose a system for hosting of video content over a network (figure 1; column 2 lines 5-39; and column 3 line 50 to column 4 line 9), comprising: a content owner facility comprising a content owner network server (figure 1; and column 4 lines 5-18); a service facility comprising: a video encoding module configured to receive the video content (figure 1; and column 4 lines 1-4); a video logging module (video cataloger) configured to receive the video content and generate an index of the video content (abstract; figures 1 and 7; column 6 lines 18-22; and column 7 lines 15-34); a video application server module (metadata track index manager) configured to receive the index of the video content (figures 1 and 7; column 3 lines 61-67; column 7 lines 15-36; and column 9 lines 9-21); and a service facility network server configured to receive the index of the video content and produce electronic templates for use by the content owner network server (figures 6-7; and column 6 line 40 to column 7 line 36); and a content distribution network configured to receive encoded video from the video encoding module and provide encoded video to a user (figure 1; column 3 lines 50-55; and column 12 line 60 to column 13 line 28).

Art Unit: 2155

10. As to claim 2, Jain et al disclose that the content owner network server comprises a content owner web server having a plurality of content owner electronic pages (figures 15-16; and column 12 line 60 to column 14 line 25).

11. As to claims 3-4, Jain et al disclose that the service facility further comprises a video index database including video index data, wherein the video index database further includes video metadata (figure 7; and column 7 lines 15-36).

12. As to claim 5, Jain et al disclose that the content owner network facility includes a content owner website (figure 15; and column 13 lines 6-11 and 21-28).

13. As to claims 6-8, Jain et al disclose that the service facility network server includes a service facility web server, which is configured to produce one or more search form web pages and produce search results information (figures 16-17; and column 13 line 35 to column 15 line 10).

14. As to claim 9, Jain et al disclose that the service facility further comprises an administration module configured to manage the service facility network server (figures 7, 9, and 15; column 9 lines 9-30; and column 12 line 60 to column 13 line 11).

Art Unit: 2155

15. As to claim 10, Jain et al disclose that the service facility further comprises a video editorial module configured to allow human-directed annotation of the video content (figure 7; and column 7 lines 23-34).

16. As to claim 11, Jain et al disclose a system for delivering media content services over a network (figure 1; column 2 lines 5-39; and column 3 line 50 to column 4 line 9), comprising: media content to which a content owner has rights (figure 7; and column 7 lines 23-34); a content owner facility comprising a content owner network server (figure 1; and column 4 lines 5-18); a service facility comprising; a video processing module configured to extract metadata from the media content and encode the media content (figure 1; and column 4 lines 1-18); and a hosted video application module configured to provide video elements for display on the content owner facility network site (figures 6-7 and 11-12; column 6 line 40 to column 7 line 36; and column 10 line 50 to column 11 line 50); and a content distribution network providing media content to a user (figure 1; column 3 lines 50-55; and column 12 line 60 to column 13 line 28).

17. As to claim 12, Jain et al disclose that the content owner facility further comprises a network server (figure 1; and column 4 lines 5-18).

18. As to claims 13-14, Jain et al disclose that the network is the Internet (column 1 lines 60-63; and column 5 lines 53-60); and the network server is a web server (figures 15-16; and column 12 line 60 to column 14 line 25).

19. As to claims 15-16, Jain et al disclose that the video elements include HTML instructions; and the media content is encoded video content (figures 1 and 15; column 3 line 50 to column 4 line 18; and column 12 line 60 to column 13 line 33).

20. As to claims 17-23, they are also rejected for the same reasons set forth to rejecting claims 1, 3, 5-6, 8-9, 11, and 15 above, since claims 17-23 are merely a method of operation for the apparatus defined in the claims 1, 3, 5-6, 8-9, 11, and 15.
